

Character

For the work that has been done for the charter we have as the player in the game, Ashton Davenport, our character creator, worked on two main ways to get our character done. One of these ways was to have each team have its own style of player and the other one was to have every player look the same and the one we went with for the final game was having all of the players from every team look the same. This we felt as a team would work with our overall concept of everyone being one better.
